(54) HOME DELIVERY OBJECT STORING DEVICE

(57)Abstract:

PURPOSE: To receive a home delivery object on the convenient date by unlocking a lock mechanism when the data of an identification card and a delivery card and the data stored in advance coincide.

CONSTITUTION: A card 1 recording the identification data specifying a home is distributed in advance to a distribution center A and the receiver home based on the contract for receiving a home delivery object at the time of absence. When the receiver is absent, the identification data of the home delivery object (a) and delivery infeasibility are inputted from the ten-key 8a of a card issuing unit 8, and the host computer 4 of the distribution center A checks an empty box in a storage box 1 and displays that effect on the display section 8b of the card issuing unit 8. A clerk in charge writes the prescribed data from the ten-key 8a and stores the data into the RAM 21 of a controller 7 via a communication apparatus 3 and the host computer 4. An issued card 2 is put in the mailbox of the absent hole B, and the home delivery object (a) is stored and locked in the prescribed storage box. When both data of cards 1, 2 coincide, a lock mechanism is unlocked, and the home delivery object can be received.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
